POST 1 · HVAC · EDUCATIONAL

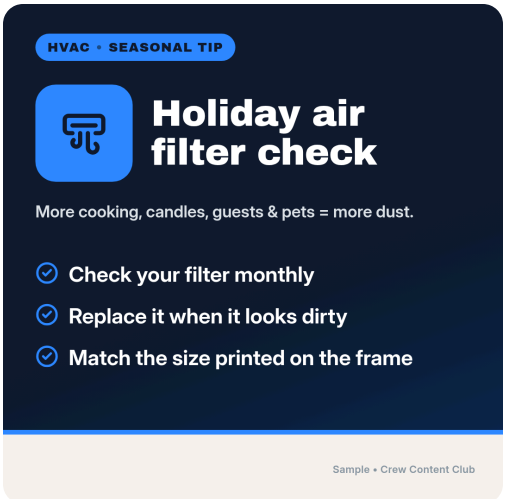

What do AUX & EM HEAT mean?

Seeing "AUX" or "EM HEAT" on your thermostat? Here's the simple version:

🔹 AUX (auxiliary) heat: your heat pump is getting a little help from its backup heat. It's common on chilly mornings or during a defrost cycle.

🔹 EM (emergency) heat: only the backup heat runs. It's meant for when the heat pump itself can't run. Backup heat costs more to run, so keep your thermostat on regular HEAT. If AUX seems to run all the time, or your home isn't warming up, call [YOUR COMPANY] at [PHONE].

POST 2 · HVAC · TIP

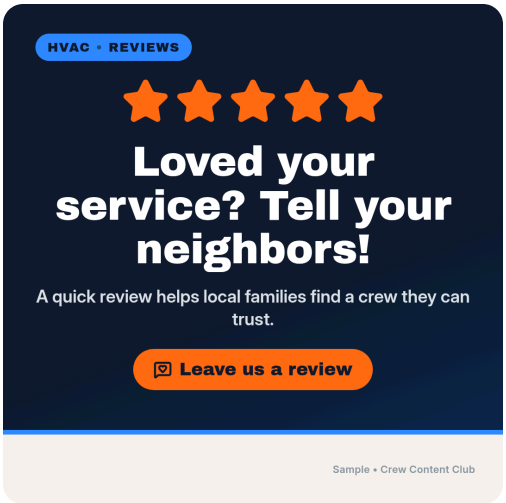

Holiday air filter check

Holiday cooking, candles, guests and pets all add up to more dust in the air. 🎄 Your air filter catches a lot of it, right up until it's clogged. Slide it out and take a look once a month. If it's gray and dusty, replace it with the same size (it's printed on the frame). Pro tip: write today's date on the new filter so you know when you changed it. Not sure where your filter is? Ask [YOUR COMPANY] at [PHONE].

Cold snap? Protect your pipes.

Freezing temps on the way? ❄️ A few minutes now can save you a big mess later. Disconnect and drain your garden hoses, and cover any pipes or hose bibs that are exposed outside. Take a minute to find your main water shutoff valve and make sure everyone in the house knows where it is. If a pipe ever bursts, shut off the water right away and give us a call. Questions about protecting your pipes this winter? Call [YOUR COMPANY] at [PHONE].

POST 5 · PLUMBING · MYTH-BUSTER

Are “flushable” wipes OK to flush?

Myth: if the package says “flushable,” it's safe to flush. 🚽 Fact: wipes don't break down the way toilet paper does. They can snag in your pipes, back up your drains and clog sewer systems. The EPA encourages everyone to flush only toilet paper. Toss wipes, paper towels and other products in the trash instead, even if the label says flushable. Already dealing with a slow drain or a toilet that keeps clogging? Call [YOUR COMPANY] at [PHONE] and we'll take a look.

POST 7 · ROOFING · TIP

After a storm, check your roof from the ground

After a big storm, it's smart to take a quick look at your roof, from the ground. 🏠 Please don't climb up there yourself. Walk around your home and look for missing or lifted shingles, sagging gutters or debris piled in the valleys. Inside, check ceilings and the attic (if it's safe to get to) for new stains or drips. Spot something? Snap a photo from the ground and call [YOUR COMPANY] at [PHONE]. We'll handle the climbing.

Every roof type has its own strengths and its own care needs, and it's good to know what you've got before you need a repair. Not sure what's up there or how old it is? [YOUR COMPANY] can take a look and walk you through it. Call [PHONE] anytime.

POST 9 · ELECTRICAL · TIP

Decorating with lights? Do it safely.

Time to deck the halls! 🎄 Before you plug in, check every string of lights. NFPA recommends replacing any set with worn or broken cords or loose bulb connections. Use lights rated for outdoor use outside, hang them with clips instead of nails, and turn them off before you head to bed or leave the house. Tripping breakers or outlets that feel warm? Don't open the panel. Call [YOUR COMPANY] at [PHONE] and let a licensed electrician take a look.
